Technical data

Description	Zentrierspitze
Installation height mm	178 - 243
Maximum characteristic load-bearing capacity (kN) *	41,3**
Bottom plate mm	110 x 110 x 6
M 24 thread at the bottom	65
M 24 thread at the top	65
12 mm hole at the bottom	4
Upper plate mm	Ø 96 x 6
10.5 mm hole at the top	4

A system for all applications! Threads of 20 to 30 mm and the most varied plate sizes with 6 to 15 mm material thickness - we have the perfect solution for any application. Lift-off and lateral impacts can be counteracted with a straight screw connection into the cross-grained wood using fully-threaded 10 x 120 mm wood screws (with European Technical Approval) or a strut or lateral latches. Of course, post bases of the right/left-threaded system are still height-adjustable when mounted and under heavy load. The use of additional lock nuts increases the rigidity of the connection.
