### Technical data

|                            |                |
|----------------------------|----------------|
| M 30 thread at the bottom  | 90             |
| M 30 thread at the top     | 65             |
| Hole Ø 12 mm at top        | 4              |
| Installation height mm     | 175 - 235      |
| Bottom plate mm            | 160 x 100 x 10 |
| Bore Ø 13 mm at the bottom | 4              |
| Upper plate mm             | 100 x 100 x 10 |

A system for all applications! Threads of 20 to 30 mm and the most varied plate sizes with 6 to 15 mm material thickness - we have the perfect solution for any application. Lift-off and lateral impacts can be counteracted with a straight screw connection into the cross-grained wood using fully-threaded 10 x 120 mm wood screws (with European Technical Approval) or a strut or lateral latches. Of course, post bases of the right/left-threaded system are still height-adjustable when mounted and under heavy load. The use of additional lock nuts increases the rigidity of the connection. Standard version with square upper plate.
