

Post bases 10920.1493

Technical data	
M 30 thread at the bottom	250
M 30 thread at the top	65
Installation height mm	335 - 395
Maximum characteristic load-bearing capacity (kN) *	169,0
Bottom plate mm	160 x 100 x 10
Bore Ø 13 mm at the bottom	4
Upper plate mm	Ø 100 x 10
11 mm hole at the top	4

A system for all applications! Threads of 20 to 30 mm and the most varied plate sizes with 6 to 15 mm material thickness - we have the perfect solution for any application. Lift-off and lateral impacts can be counteracted with a straight screw connection into the cross-grained wood using fully-threaded 10 x 120 mm wood screws (with European Technical Approval) or a strut or lateral latches. Of course, post bases of the right/left-threaded system are still height-adjustable when mounted and under heavy load. The use of additional lock nuts increases the rigidity of the connection.
