### Technical data

|                                                     |                |
|-----------------------------------------------------|----------------|
| M 30 thread at the bottom                           | 65             |
| M 30 thread at the top                              | 150            |
| 15 mm hole at the bottom                            | 4              |
| Hole Ø 12 mm at top                                 | 4              |
| Installation height mm                              | 205 - 300      |
| Maximum characteristic load-bearing capacity (kN) * | 168.6          |
| Bottom plate mm                                     | 160 x 100 x 15 |
| Upper plate mm                                      | 100 x 100 x 15 |
| Mandrel, pipe thread M 44 mm                        | 130            |

The leading post base series for joinery stations and carpenters. A versatile post base system accepting compressive, tensile and transverse forces. Height-adjustable even when installed and under heavy load. The use of additional lock nuts increases the rigidity of the connection.
