

Post bases 10901.0000

Technical data	
Hole Ø 12 mm at top	4
Installation height mm	122 - 182
Maximum characteristic load-bearing capacity (kN) *	54,0**
Bottom plate mm	100 x 100 x 6
12 mm hole at the bottom	4
Upper plate mm	Ø 100 x 6
M 20 thread at the bottom	55
M 20 thread at the top	55

A system for all applications! Threads of 20 to 30 mm and the most varied plate sizes with 6 to 15 mm material thickness - we have the perfect solution for any application. Lift-off and lateral impacts can be counteracted with a straight screw connection into the cross-grained wood using fully-threaded 10 x 120 mm wood screws (with European Technical Approval) or a strut or lateral latches. Of course, post bases of the right/left-threaded system are still height-adjustable when mounted and under heavy load. The use of additional lock nuts increases the rigidity of the connection. For lateral fixation, the mandrel M20 x 90 mm is inserted into the timber column.
