Technical data

for connectors

HVP-Serie 880 - 883

Easy handling, precise and fast. Thanks to its compact build, the milling device can be applied in all main and secondary joist connections for all HVP sizes with 12 mm thickness. It ensures accurate milling for the connectors through harmonised components. Linear guides enable an absolutely clean and accurate milling cut-out. The eccentric clamping device allows for fast and precise fastening. The ergonomic design makes for comfortable and time-saving work.
