Technical data

Material	20
Ø mm	45
Total length (mm)	75
Material: Milling cutter	Fräsbohrer HSS FRB 20 x 45 A
Load capacity	HSS

Accessories for the Scheer HM 14 milling device A guide bush Ø 30 mm and a milling cutter Ø 20 mm are required to achieve an accurate milling cut-out. This combination is required for an optimum cut-out. It results in the accurate milling surface for the corresponding connector. This enables fast assembly without the need to additionally calibrate our connectors.
