

Post bases 10529.1193

Technical data

M 30 thread at the bottom	150
Hole Ø 12 mm at top	4
Bottom plate mm	140 x 140 x 12
Max. tensile load	209 - 269
Bore Ø 13 mm at the bottom	4
Upper plate mm	Ø 120 x 12

Heavy-duty-version Turn – click: the innovative post support system with centring tip

The Pitzl plug-in system makes installation an effortless process. The components can be optimally pre-assembled in advance, so that only a few steps are required on site: plug in, snap into place – done. This not only reduces installation time, but also the need for tools, labour and personnel resources.

Thanks to coordinated material thicknesses, the system ensures maximum load-bearing capacity against compressive, tensile and transverse forces. Height adjustment is also possible when installed and under high loads.

**Further static values can be found in our static book and in ETA 10/0413.*
